DETAILED ACTION

Response to Amendment

1. This communication is responsive to the applicant's amendment filed on 07/02/2008. The applicant(s) amended claims 7, 12 and 21, and cancelled claims 11, 23 and 29-30 (see the amendment: pages 2-6, and Examiner's amendment below).

The examiner withdrew the claim rejection under 35 USC 103, because the applicant amended the corresponding claims and provided persuasive arguments (the amendment: pages 9-11), which overcame the previous prior art rejection and provided considerable basis for allowance (see the reason for allowance below).

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with the applicant's representative, Vaken Alexanian (37270) (via Michael J.Buchenhorner, 33161) on 09/23/2008. The Examiner's Amendment is as following:

In the claims (based on the amendment filed on 07/02/2008):

For **claim 7**, line 3 of the claim, after "a key comprises a", delete "semantically".

For **claim 21**, line 5 of the claim, after “wherein in the keys comprise”, delete the word “semantically”.

For **claims 29-30**, cancel these claims.

-----End of Examiner's Amendment-----

Allowable Subject Matter

4. Claims 7-10, 12-14, 16-22, 24-26 and 31-32 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent **claims 7 and 21**, the instant application is directed to a method and an article of manufacture for mining a collection of data. Each of the independent claims, combining some well known features in the art, identifies the uniquely distinct features of:

converting the collection of data into labeled data by grouping various types of data into a same format and assigning a label indicating a category of item contents, such that the labeled data is in analyzable condition for concept extraction, and wherein the labeled data comprises the label and a clause comprising the item contents;

assigning a category into the key words, wherein the category references a concept so that the key words can be handled as concepts with a meaning;

separating the clauses into pairs comprising an independent word and an attached word;

assigning categories to the separated clauses using syntactic patterns and a category dictionary;

generating, by syntactic analysis, a syntactic tree of a sentence comprising the separated clauses.

5. The prior art of record, Vaithyanathan et al. (US 5,857,179), Liddy et al. (6,006,221) hereinafter referenced as Liddy, provided numerous teachings and techniques for categorizing document, clustering the resultant vectors, clustering document by identified terms representing key words, providing principal component analysis (PCA) and singular value decomposition (SVD), and using K-means clustering and Tf-idf method based on term frequency for document clustering and classification, disclosing conceptual relationships and extracting the cluster summary data; providing document retrieval using a natural language query, generating conceptual representation using part of speech (POS) tagging, hierarchical concept mapping, concept categorization, probabilistic term indexing and tree structure representing the query. However, the combined features stated above, are not anticipated by, nor made obvious over the prior art of the record.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
